

Monash Health Referral Guidelines

REFUGEE HEALTH – ADULT INFECTIOUS DISEASES AND INTERNAL MEDICINE

EXCLUSIONS

Services not covered by these guidelines

Patients under 17 years: [Click here for Refugee Health Paediatric guidelines](#)

CONDITIONS

Latent TB infection
Chronic viral hepatitis (B and C)
Other infectious diseases
Chronic medical conditions

The primary focus is infectious diseases, but other medical conditions and diagnostic problems can be addressed

PRIORITY

All referrals received are triaged by a **Monash Health clinician**.

The clinic is for asylum seeker and refugee patients who require **non-urgent** medical care. If more specialised investigation or management is required, patients may be referred to sub-specialty clinical services elsewhere in Monash Health.

REFERRAL

How to refer to Monash Health

Find up-to-date information about how to send a referral to Monash Health [on the eReferrals page on our website](#).
